

## Tracking Research

### Public Evaluation on Media Credibility Survey Results

*[To enable the sample information to reflect the characteristics of Hong Kong population as much as possible, all figures **had been weighted** according to the latest sex-and-age distribution of the Hong Kong population aged 18 or above since 2006, as released by the Census and Statistics Department. Due to the process of weighting, sample sizes might slightly differ from unweighted ones. Besides, the total percentage for some questions might not equal exactly to 100% due to rounding. ]*

I will read out one by one the names of individual press and media institutes in Hong Kong. We would like to know how credible you think these institutes are. You can score from 1 to 10, 1 point refers to a “very low” level of credibility and 10 points refer to a “very high” level of credibility. 【The following names of press and media institutes were randomly ordered by computer to be read out】

Overall, how credible do you think the press and media in Hong Kong are? Again, 1 to 10, how many points will you give?

#### Individual and overall evaluation for the credibility of the press and media institutes in Hong Kong

Year of Survey	1997	2001	2006	2009	2010	2013
<b>Press and Media Institutes</b>	Average score (rank)
