

# 大陸高校學術研究環境——側重新聞傳播學

劉潔

大陸正雄心勃勃地推進世界一流大學建設計畫，已經列出了詳細的時間表，這個計畫將對學術研究環境的變遷產生重大影響。高校對研究人員的學術背景和學術成果的要求，無論作為入職的起點條件還是聘期考核條件，都越來越高，呈現出回應國家和社會重大現實問題、探索學術前沿及爭取國際學術話語的複合追求。以學術研究經費為代表的研究資源比較充裕，如何合理合法使用資源、提高資金使用效率需要改進。學術評價體系在建設過程中，加強同行評議、協力廠商評價、長時段評價等成為目前較集中的呼聲。大學學術組織正在朝超學科、跨學校、跨地區等更加靈活的方向演變，期望能一定程度上克服大學內部學術組織僵化問題。大學同社會的互動，包括研究問題的確立、成果轉化等存在較多問題急需解決。

## **The Academic Research Environment of Universities in Mainland: Place Emphasis on Journalism and Communication**

**LIU Jie**

The government of mainland is advancing the world class university construction plane ambitiously which has a detailed schedule. The plan will have a major impact on the change in trends of the academic research environment. No matter entry or assessment requirements on educational background and academic achievements is more and more higher. The universities aspire after academic research response to the significant demands of government and society, exploring academic frontier and contesting for international discourse power. Funding for academic research is relatively abundant, but reasonable, lawful and efficient use of funds is a question. The universities are consummating academic appraisal system. An appeal is being made for peer evaluation, independent evaluation and long term evaluation.

University academic organizations are more flexible to overcome rigid structure with a tendency towards of super discipline, cross universities and industries. The interaction between universities and society issues urgent need to address, include studying problems and transformation of research achievements.
